

IT SERVICES

One Telecoms Supplier, One IT Supplier...
One Supplier Too Many

At Network Telecom, we aren't just about phone lines and broadband. Our IT services and NOC team can handle all of your IT needs, effectively combining them with your chosen voice and connectivity solutions.

We supply all aspects of IT services from maintenance and computer hardware, to email, data and network security. Furthermore, by partnering with state of the art UK secure data centres we provide a range of cloud based services for businesses wishing to remove the hassle and risk of having IT infrastructure maintained on-site.

We directly install and maintain your IT to give you complete peace of mind that your business communications are in the right hands. Network Telecom can host your company website and emails, ensuring the fastest page load times and reliable email deliveries.

Our range of services allow your employees to work anywhere - anytime, using any device, ensuring their business critical applications never leave their fingertips.

We understand the importance of IT to your company and how any downtime can cause huge inconvenience, revenue losses and reputational damage. Because of this, Network Telecom provide remote monitoring on the systems we provide meaning your connectivity and IT services are monitored 24/7.

Delivering our IT support service is our experienced in-house team of technical NOC specialists plus an entire network of Field Engineers dedicated to providing first class customer service.
